

Project Design Phase-I Solution Architecture

Team ID	PNT2022TMID11787
Project Name	Signs with Smart Connectivity for Better road safety
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- ✓ Find the best tech solution to solve existing business problems
- ✓ Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders
- ✓ Define features, development phases, and solution requirements
- ✓ Provide specifications according to which the solution is defined, managed, and delivered
